2019

Webinář: Monthly Oncology Tumor Boards: A Multidisciplinary Approach to Individualized Patient Care – Prostate Cancer

Termín konání: 24. června 2019

The Emerging Role of Tumor and Germline Genetic Testing and the Treatment of Advanced Disease

Many clinicians are uninformed on the emerging role of germline and tumor genetic testing for risk stratification of men with localized prostate cancer. However, this information is essential to assure selection of the best management option, which may allow many younger men with indolent cancer to avoid treatment and its side effects. In addition, clinicians should be made aware of recent clinical trial results in the non-metastatic CRPC setting, so patients can delay the onset of metastases as long as possible. Finally, most clinicians have little experience using immunotherapy in men with progressive, metastatic castration-resistant prostate cancer, so they require education on patient selection and adverse effect management.

2018

2018 Genitourinary Cancers Symposium

Termín konání: 8. – 10. 2. 2018

Místo konání: Moscone West Building, San Francisco

The 2018 Genitourinary Cancers Symposium will feature an array of multidisciplinary sessions covering prostate, renal, urothelial, testicular, and adrenal cancers. World-renowned faculty will present on the most clinically relevant topics across these disease sites and offer insight into the future of cancer care for GU malignancies.

This year, the program will include case-based discussions and debates in each disease site to highlight the clinical application of the latest research in the field. Topics for these presentations include “Magnetic Resonance and Magnetic Resonance-Directed Biopsy in Localized Prostate Cancer: Where is the Field Moving?,” “Multimodality Approach to Locally Advanced Bladder Cancer,” “Management of Residual Masses in Germ Cell Tumors,” and “Comprehensive Characterization and Management of the Incidental Renal Mass.” Subspecialties represented on these and other panels in the program include medical oncology, radiation oncology, surgery, urology, and pathology.

EAU Update on Bladder Cancer (BCa18)

Termín konání: 8. – 9. 6. 2018

Místo konání: Munich, Germany

With novel systemic therapies, new agents and developments in pathology and genomics, treatment strategies for urothelial tumours have become more complex. The new **EAU Update on Bladder Cancer (BCa18)** on 8 and 9 June in Munich, Germany, offers the opportunity to resolve your decision-making dilemmas.

This fully interactive two-day event provides:

- In-depth, comprehensive and practical updates on bladder cancer management
- Latest developments emerging from ongoing clinical immunotherapy studies
- Direct feedback and interaction with experts from ESMO and EAU
- Point-by-point assessment of diagnostic and treatment strategies
- Evaluation of participant's knowledge.

Whether you need a full overview of guideline-compliant therapies or fresh insights on multidisciplinary approaches, BCa18 is a compact, expert-directed meeting.

NCCN 23rd Annual Conference: Improving the Quality, Effectiveness, and Efficiency of Cancer Care™

Termín konání: 22.-24. 8. 2018

Místo konání: Rosen Shingle Creek, Orlando, Florida

The NCCN Annual Conference: Improving the Quality, Effectiveness, and Efficiency of Cancer Care™ attracts more than 1,600 registrants from across the United States and the globe including oncologists (in both community and academic settings), oncology fellows, nurses, pharmacists, and other health care professionals involved in the care of patients with cancer. Respected opinion leaders present the latest cancer therapies and provide updates on selected NCCN Clinical Practice Guidelines in Oncology (NCCN Guidelines®), the data upon which the NCCN Guidelines® are based, and quality initiatives in oncology. Topics change annually but focus on the major cancers and supportive care areas.

UROwebinar: Treatment strategy in muscle invasive bladder cancer

Treatment strategy in muscle invasive bladder cancer

Presenter: **Prof. Muhammad Shamim Khan (GB)**

Save the date: **Tuesday, 19 December**

Time: **18:30 to 19:30 (Central European Time)**

The learning objectives of **this webinar** are:

- Aetiology, modes of presentation, clinical, radiological and histopathological assessment
- The value, disadvantages and contra-indications of neo-adjuvant chemotherapy
- How to choose the appropriate treatment based on the patient's age, co-morbidities and pathological factors once appropriately staged
- Various surgical approaches in radical cystectomy, the preferences of urinary diversions and how to make a rational choice
- Key aspects of enhanced recovery and oncological outcomes as per disease stage and histopathological variants

How to join

Please **register online** to join the webinar. You will receive your confirmation together with the webinar's information via email. The webinar is viewable via PC, smartphone or tablet.

9th European Multidisciplinary Meeting on Urological Cancers – EMUC 17

Termín konání: 16.-19. 11. 2017

Místo konání: Palau de Congressos de Catalunya, Barcelona, Spain

Barcelona, Spain, will host from 16 to 19 November 2017, the 9th European Multidisciplinary Meeting on Urological Cancers (EMUC17), one of Europe's well-attended international conferences for multidisciplinary specialists with expertise in urological malignancies.
